---

Hey Chip,

Did EPA receive a recent briefing or does Dwight's note relate to the older briefing you mentioned where the Port noted that they were simply pursuing WRDA funds?

Matt McClincy

Hi Matt,

Our WRDA project team has briefed EPA separately (and will continue to update them). I wanted to provide this briefing specifically to the DEQ project managers for the two upland sites and any other DEQ personnel that may be interested.

Hi Dwight,

I am the DEQ source control coordinator for Portland Harbor and wanted to ask you a question prior to the meeting to confirm that the right people are in attendance. Your meeting invitation indicates that the Willamette Cove and Swan Island projects will be addressing contaminated sediment. Since EPA is the lead agency for in-water work, I suggest that EPA representatives be included in the briefing. Please let me know whether or not the projects are limited to upland work. If they include in-water elements, I am happy to coordinate with the EPA team to identify who should attend.

**Subject:** Briefing on WRDA Project for Willamette Cove and Swan Island

Ken and Dave,

The Port has been working with the Army Corps of Engineers on a project to clean up contaminated sediment at Willamette Cove and Swan Island under authorities of the Water Resource Development Act (WRDA). I would like to provide an update on this project to you both. I am proposing the following dates/times for this briefing:

Tuesday, October 2<sup>nd</sup>, 3:00 – 4:00 pm

Wednesday, October 3<sup>rd</sup>, 2:00 – 3:00 pm

Please let me know if either of these dates/times work for you. If not, please provide alternative dates/times.

Thanks,

Dwight Leisle PE, PMP
